### DETAILED ACTION

Applicants' summation in the paper filed 11/26/2001 (Paper No. 19) of the 11/16/2001 teleconference is acknowledged. However, the 11/16/2001 teleconference was not an invitation to have multiple groups of patentably distinct inventions examined. The amendment filed

5 12/13/2001 (Paper No. 20) has been entered.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 29-42, drawn to a method for determining if a substance inhibits the binding of TGF-beta to Alk-1, classified in class 435, subclass 7.1.
- 10 II. Claims 43-52, to the extent that they are drawn to a method for determining if a substance inhibits TGF-beta/Alk-1 induced Smad1 phosphorylation, classified in class 435, subclass 7.1.
- 15 III. Claims 43-52, to the extent that they are drawn to a method for determining if a substance inhibits TGF-beta/Alk-1 induced Smad5 phosphorylation, classified in class 435, subclass 7.1.
- IV. Claim 53, to the extent that it is drawn to a method for determining if a substance inhibits constitutive Alk-1 induced Smad1 phosphorylation, classified in class 435, subclass 7.1.
- 20 IV. Claim 53, to the extent that it is drawn to a method for determining if a substance inhibits constitutive Alk-1 induced Smad5 phosphorylation, classified in class 435, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1647

The following pairwise combinations of methods are independent and distinct, wherein each member of a pair performs different functions, using different starting materials and/or process steps and/or with different outcomes: I and each of II-V; II and each of III-V; III and each of IV-V; IV and V.

5           Because these inventions are distinct for the reasons given above and the searches required are not coextensive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

10           Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the  
15           currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
